Card Edge Connectors

One of EDAC's original product families, the Cardedge+ family of card edge connectors has grown to become one the largest offerings available in the market. Available in a number of contact spacings, with multiple options for contact terminations, plating thicknesses and mounting styles, providing our customers more flexibility with their designs.

Features

- Card Edge connectors available in excess of 350,000 standard parts, and capabilities to produce custom variations
- Contact spacings of 0.050", 0.100", 0.125", 0.150", 0.156" and 0.200" Selective gold plating on contact mating area or gold all over with nickel under plating
- PCB thru-hole, wirewrap, solder eyelet, extender board tail, and other specialized contact options
- From 2 to 188 contacts in single, bridged, and dual rows with or without card supports

Pressfit Card Edge Connectors

EDAC offers a very broad range of press-fit card edge connectors. Our Edgefit product utilizes a contact design that allows for ease of assembly into the PCB with the use of simple flat rock tooling. Once installed, this solderless connection provides superior shock and vibration resistance while also providing significant labour savings.

Features

- 0.100" (2.54mm) to 0.156" (3.96mm) contact spacing
- Single or dual row up to 150 contacts
- Press fit compliant section for gas tight connection and solderless operations
- Accepts between and in contact polarizing keys
- Low profile or high profile body available
- Contact termination options include PC tail or wire wrap
- Tools available for installation, contact removal, flat rock press to board

Metal to Metal Card Edge Connectors

The EDAC E-Met family is a two piece, metal to metal, high reliability connector solution. Utilizing our Edacon hermaphroditic contacts, the fork-like design incorporates four mating surfaces providing a gas tight connection with high shock and vibration resistance. For board to board, or wire to board applications, they can be used with 0.062" or 0.093" printed circuit boards.

Features

- Edacon hermaphroditic contact mating design
- High shock and vibration resistance with 10 amp current rating
- 0.200" (5.08mm) contact spacing X 0.125" (3.18mm) row spacing with staggered grid
- Plug termination is a PC tail
- Receptacle terminations include PC tail, wire hole and wire wrap

High Temp Card Edge Connectors

EDAC High Temp card edge connectors utilize high temp insulators ideal for the RoHS infrared soldering process. All of the features of our standard cardedge are available in these ruggedized versions. A solid performer over a wide temperature range from -40° C to +125° C.

Features

- 6-88 contacts in single or dual row
- 5 amps contact rating
- Wide variety of mounting options
- Standard PC tail, 90 degree bend or wire wrap contacts
- Diallyl Phthalate or Polyphenylene Sulfide high temp material

EDAC

High Speed Card Edge Connectors

EDAC PCIE 3.0 and SAS Card Edge Connectors are a high speed board to board interconnect solution. Differential pair signaling provides for low insertion loss in a dense package that conserves valuable board space. Widely used in server backplanes these fine pitch connectors come in a variety of orientations and terminations to meet all design parameters.

Features

- PCIE 3.0 available in 20 to 200 contacts
- SAS available 29 or 68 contacts
- Data transmissions up to 21 Gbps
- Vertical or right-angle orientations
- SMT or Press-Fit terminations
- SAS 3.0 and PCIE 3.0 compliant

Rectangular Connectors

EDAC Rack & Panel connectors offer a high reliability connection, ideal where a large number of wires are interconnected to a panel. Available in seven body sizes ranging from 14 to 120 contact positions. The hermaphroditic contact design provides a gas tight connection with superior shock and vibration resistance. Ease of mating is facilitated with the use of an actuating screw and lock nut.

Features

- Industry standard connector with highly dependable contacts
- Hermaphroditic contact design for no-fail interconnections
- Gold over nickel plating for wire hole, PCB, wire-wrap and crimp contacts
- In sizes of 14 to 120 positions, with actuating screw or locknut and polarizing hardware
- Plastic and metal covers with cable clamps for strain relief
- Tools available for contact installation, removal, crimping and polarization

D-Sub Connectors

In the D-Mate family, EDAC offers an extensive range of industry standard D-Subminiature connectors. Available in standard density with 9, 15, 25, 37, and 50 contacts or high density versions with 15, 26, 44, 62 and 78 contacts. Vertical and right angle orientations, along with a variety of termination, plating and mounting options are available. They're also available in a stacked version.

Features

- Various industry standard footprints available in low or high density
- Plugs and receptacles in 9, 15, 25, 26, 44, 62 or 78 contact sizes
- Pin and socket contact mating design with P.C. tail termination
- Right angle and vertical orientations
- Metal shell provides EMI/RFI shielding, plug shell indents provide grounding and additional mating retention
- Board mounting features include threaded hole, two or four prong board locks for exceptional retention to P.C. board
- Flange mounting options for panel mount or connector mating include through hole, threaded holes and threaded standoffs with M3 or #4-40 UNC
- Metal or plastic body is available
- High temp options available

Machined D-Sub Connectors

The EDAC D-PIN family of D-Subminiature connectors are manufactured using precision machined contacts available from 9 to 62 positions. Standard and high density, with vertical and right angle body styles available. A number of mounting and contact plating options are available. The 5 amp current rating along with a wide operating temperature range provides for use in rugged environments.

Features

- 5 amp precision machined contacts
- Plug and receptacles in 9, 15, 25, 26, 37, 44, 50 and 62 positions
- Pin and socket contact mating design with P.C. tail termination
- Mounting options for panel mount or connector mating include through hole, threaded inserts, 4 prong board locks and removable threaded standoffs
- Wide operating temperature of -55°C to +125°C

Power Combo D-Sub Connectors

The EDAC Power-D product line is a D-Subminiature style connector combining standard signal contacts with power or coaxial contacts in the same connector. The body dimensions are similar to the standard D-sub sizes 9, 15, 25, 37 and 50 pin, and are offered in 22 different configurations. Power contacts up to 40 amps, or coaxial contacts with either 50 or 75 ohm impedance ratings are available.

Features

- Plug and receptacles in vertical or right-angle orientations
- Data signal contacts at 5 amps & power contacts handling 10, 20, 30 or 40 amps
- Pin and socket contact mating design with P.C. tail and solder cup termination
- Metal shell provides EMI/RFI shielding while plug shell indents provide grounding and additional mating retention
- Mounting options for panel mount or connector mating include through hole, threaded hole and threaded standoffs
- D-shaped connector mating outline provides polarization

Parallel Interface D-Sub Connectors

EDAC B57 connectors are parallel port interfaces fully compatible with all industry standards. Ribbon style contacts are utilized along with board locks for superior mating and retention forces. Both board receptacle and male plug cable versions are available.

Features

- 14, 24, 36, 50 or 64 positions available
- Plating options from flash to 30u" gold
- Durable phosphor bronze contacts with 1 amp current rating
- Boardlocks for superior retention
- Male plug on cable side has IDC contacts for easy assembly

Modular Jack Connectors

The EDAC E-JAX family of Modular Jacks are manufactured to industry standards and are also fully customizable. Single, ganged, or stacked versions are available up to 2 x 8 ports. Shielded or unshielded, with a variety of LED options. SMT and through hole terminations are available in right angle or vertical orientations. Multiple plating options are also available.

Features

- RJ11/RJ45 single or stacked units available in multiple body styles, with or without LEDs, and various mounting options
- Right angle or vertical mount in through hole PCB or SMT
- Gold flash or gold plated contacts, including high thickness gold for telecom
- Shielded front ground, shielded rear ground, unshielded, or face shielded versions
- Up to 8 ports ganged single row or 16 ports stacked dual row
- Optional LEDs in mixed combinations of green, orange, red, or yellow including bi-color variations
- Low or high profile types, keyed or unkeyed, with or without mounting flange

USB Connectors

EDAC Standard USB's are available in all types A,B and C in vertical or right angle orientations. USB's combine data and power in a small package. Type C offers ten times the speed of conventional USB's plus cords will mate in either direction.

Features

- USB Type A, B and C are available
- Up to 10 Gbps communication speed for USB Type C 3.1
- Industry standard plug and play technology
- Hot pluggable
- Compatible with asynchronous and isochronous data transfer methods
- Stacked versions available up to 4 ports

HDMI Connectors

EDAC HDMI connectors follow industry standards and are available in vertical or right angle orientations. Single or dual port versions are available. These deliver high speed video transmissions resulting in very high resolution images.

Features

- Standard 19 pin type A, micro versions, and an automotive shrouded version are available
- Vertical or right angle and single or dual stacked
- Plating options from gold flash to 30u" gold for high insertion cycles
- Hot pluggable
- Synchronous and asynchronous data transfers

Wire to Wire & Wire to Board Connectors

The EDAC E-WTB wire to board connectors provide a reliable and economical connection. These shrouded headers are available in a variety of positions. Right angle, vertical, SMT or through hole mounted to the PCB, these connectors are ideal for use in wire harness applications and can be customized to meet your design parameters. Compatible with leading industry connectors as drop in replacements.

Features

- 0.079" (2.00mm) contact spacing
- For use with PC board thickness: 0.047" (1.2mm) to 0.062" (1.6mm)
- Low profile insulator body: 0.185" (4.7mm) width, 0.240" (6.10mm) height
- Contact termination options include: P.C. tail and surface mount
- Top entry or side entry configurations
- Designed for high-density connection of internal wires to PCB

Box Header Connectors

EDAC Box headers are widely used for board to board or wire to board connections. Right angle, vertical and even custom bends are available. The breakaway design allows for separation into smaller units.

Features

- Various contact pitches available
- Single or double row
- Plating options from gold flash to 30u"gold
- Open or closed ends with or without latches
- Various housing height options

Pin Header Connectors

The EDAC E-PIN male headers mate with the E-Socket receptacles providing a reliable and economical BTB connection. Available in multiple contact spacing options, in single, two or three row configurations. Termination styles include vertical or right angle through hole, and SMT. Contacts can be supplied with tin or various gold plating thicknesses. Available with customized mating heights, special bends, and much more.

Features

- Header posts can be cut to any height and board depth
- Wide variety of plating options
- Vertical, right angle or custom bends
- Breakaway design allows for easy separation into smaller units
- Colored insulators are available
- Wide range of custom capabilities and options
- High temperature materials are available
- 200 mating cycles minimum
- RoHS compliant

Socket Header Connectors

The EDAC E-Socket receptacle headers mate with the E-Pin plug headers providing a reliable and economical BTB connection. A wide variety of sizes, in single, two or three row configurations. Multiple contact spacing options, and contact plating options, and are available in vertical or right angle, for through hole or SMT mounting to the PCB. These headers are easily customized to facilitate special mating heights, special contact bends, and much more.

Features

- Wide variety of plating options
- Vertical, right angle or custom bends
- Sockets available with right angle and SMT contacts
- Colored insulators are available
- Wide range of custom capabilities and options
- High temperature materials are available

Din Header Connectors

EDAC DIN connectors are fully compliant with 41612 standards. High density metal to metal connections provide a high continuity interconnect solution in backplanes. Contacts can be fully loaded or selectively loaded to protect against cross talk in high speed applications.

Features

- From 5 to 96 contacts available in three rows
- Plating options from flash to 30u" gold
- Solder tail, wire wrap and press fit terminations
- Mounting options include through hole or boardlocks
- Wide operating temp range of -55° C to +105° C

Waterproof D-Sub Connectors

The EDAC D-Seal series of IP67 rated waterproof D-Subminiature connectors are available in both standard and high density packages. Plug & receptacles in 9, 15, 25, 26 and 44 pin versions are available as well as high power combo configurations. Vertical and right angle footprints, with a variety of termination styles, contact plating thicknesses, and mounting options are available. A solid performer in ruggedized applications and harsh environments.

Features

- Standard and high density plug and receptacles in 9, 15, 25, 26 and 44 contact pin sizes
- Signal along with high power contacts up to 40 amps combined in one connector
- Plug shell indents provide grounding and additional mating retention
- Mounting options for panel mount or connector mating include threaded inserts and threaded standoffs
- Epoxy sealed by special process providing zero ingress, no wicking up leads and a smooth molded finish with no air bubbles. Combined with solid O-ring seal to panel
- Degree of Protection: IP67 as per IEC60529

Waterproof USB Connectors

Waterproof panel mount USB connectors Type A and B standard and micro are available offering IP67 grade protection. Quarter turn twist and lock bayonet style system offers easy mating and ultra secure connections. IP67 Waterproof board mount USB connectors feature full epoxy sealing of the contacts and an O-ring seal to the panel.

Features

- Standard USB Type A, Micro USB, Mini USB & bayonet style are available
- 1.2Mbps or 480Mbps communication speeds
- 480Mbps communication speed compatible with USB 2.0 standard
- Compatible with asynchronous and isochronous data transfer methods
- Silicone rubber seals for tight seal to panel
- Bayonet locking system for safe mating under severe vibration or shock conditions
- Micro USB board mount and type C available with all rated IP 67

Waterproof HDMI Connectors

E-seal waterproof HDMI connectors follow industry standards and are available with a quarter turn, twist and lock, bayonet locking system offering easy mating and an ultra secure connection. Fully sealed on the back end with an O-ring seal to the panel insures no water ingress. These IP67 rated connectors are fully submersible and deliver high speed video transmissions resulting in very high resolution images.

Features

- Plating options from gold flash to 30u" gold plating
- Quarter turn, twist and lock, bayonet style locking mechanism
- Silicone rubber seals and fully potted terminals
- Hot pluggable
- Synchronous or asynchronous high speed data transmissions

Waterproof Plugs

Waterproof Wire to Wire & Wire to Board

The EDAC E-Inline family of waterproof plug and socket connectors provides a reliable interconnect solution in harsh environments. Single or double latch insulator designs insure superior shock and vibration resistance. A variety of styles are available for different wire gauge applications. These utilize simple crimp and poke contacts. Optional contact plugs are available for use when all contact positions are not required. Additional contacts/wires can then be added in the field.

Features

- Rated current from 3 to 10 Amps for use with wire sizes from 28 to 14 AWG
- 560 and 572 series offer double latch solution
- Available in wire-to-wire and wire-to-board options
- True crimp and poke solution
- Internal polarization to prevent mismating
- Available with wire already installed
- Waterproof grade IP52 and IP67 certified

Cable Assemblies

EDAC specializes in custom cable assemblies to meet or exceed the needs of your application. We have an extensive array of connectors to utilize in connecting your world. Various cable lengths, shielding, custom colors, customized connectors, wire gauges, jackets, latching mechanisms and custom markings are available.

Features

- Standard lengths from 1 to 10 meters or 3 to 30 feet
- Breakout cables for multiple terminations
- Adaptors for DVI digital to VGA analog conversion
- USB cables in standard printer/device format (A to B) and alternates (A to A, B to B)
- Mini USB, Mini DIN, RJ45, RJ11, and other computer cables available in bulk
- Virtually any cable manufactured to mate with EDAC

Custom Connectors

At EDAC we specialize in custom solutions meeting specific application requirements in either full custom designs or through modifications of standard products. We offer quick turn around with first article samples in as little as 4 weeks. Our engineering team will take your ideas and turn them in to reality.

Features

- Special technical requirements including high voltage or high temp
- Custom sealing to allow for use in harsh environments
- Built in security features such as keyed entry and locking systems
- Variations of standard products to fit the application for size and function
- Modifications to match competing products to fulfill end of life situations

customerservice@edac.net

Established in 1966, EDAC soon became a world leader in providing connectors for Card Edge and Rack & Panel applications. Since then, we have expanded our product offering to include one of the widest ranges of interconnect solutions in the world. Products include D-Sub, Modular Jacks RJ45, USB, HDMI, Inline Plug & Socket, Headers, Waterproof Connectors and Custom Solutions. Our dedicated teams of engineering, customer service, field support, and global distribution partners allow EDAC the opportunity to support many unique applications globally.
